

FORT CAROLINE NATIONAL MEMORIAL

PUBLIC USE REPORTING AND COUNTING INSTRUCTIONS

Following are detailed instructions for collecting and reporting data to be entered on Form 10-157, Revised, Monthly Public Use Report by **Fort Caroline National Memorial**. These instructions are effective the date of issuance and will continue in effect unless changed by amendment or by memorandum from the Socio-Economic Studies Division to the superintendent approving a requested change.

Each item below describes the procedures to be followed in collecting public use data and summarizing the various elements of those data for entry on the corresponding line on the 10-157, Monthly Public Use Report.

Recreation Visits

A. Traffic counters are located at the following locations:

1. An inductive loop traffic counter is located on the entrance lane to the Visitor Center.
2. An inductive loop traffic counter is located on the entrance lane to Spanish Pond.
3. A pneumatic tube counter is located across the road to Ribault's Column.

The traffic counts in 1, 2, and 3 (traffic counter 3 is divided by two to correct for entering and exiting) are summed for total vehicles entering the memorial. The traffic count is reduced for nonreportable vehicles (492 per month) and buses. The reduced traffic count is multiplied by 0.6673 to adjust for duplicate reporting. The adjusted traffic count is multiplied by the persons-per-vehicle multiplier of 2.7.

B. The number of bus visitors (school buses, church vans, etc.)

C. The number of commercial buses is multiplied by the persons-per-bus multiplier of 40.

D. The number of hikers, joggers and bicyclist.

E. The number of bicyclists.

Recreation Visitor Hours

The total recreation visitors are multiplied by one hour.

Special Use Data

- | | |
|---------|--------------------------------|
| Line a. | Visitors to the visitor center |
| Line b. | Visitors to Spanish Pond |
| Line c. | Visitors to Ribault Column |
| Line d. | The number hikers/joggers |
